Are you getting bored this summer?

Do you want something fun to do?

Do you want to be able to message your friends without your annoying little siblings finding out? Join this fun and interesting course about secret messages!

This course, for grades 7-10, includes an introduction to twenty-one ciphers including substitution, Vignere, Enigma, Playfair, permutation, stream, block ciphers, and many more. It even includes an interesting lesson on RSA. It covers mathematical topics such as modular arithmetic, fast exponentiation with large lumbers, and many more. Contact me immediately at rishi_tutor@outlook.com for more information.

If you sign up for this course by Friday, June 30 will be emailed a video every week starting Monday, July 3. The first video is free! For more info, email me today.
