

Python Videos

These free Python videos are part of an course tailored towards intermediate-level Python coders. After reviewing the basics of Python, the course goes on to describe how to code complex mathematical operations in Python relating to calculus, linear algebra, and data analysis. The next unit reviews machine learning in Python, and the course ends by teaching additional real-life applications in Python.

If you or somebody that you know is interested in taking this course, please visit <https://www.rpk.krishnamurthy.tech/pythonvideos>. These videos expire on Friday, July 19th, 2024, so please make full use of them. This course is a self-study, so no enrollment is needed. You can access any part of this course at any time. If you have any questions, please contact me at LearnWellNow@gmail.com today.
